Experience

Revspot.ai | Associate Product Manager Bengaluru, India | Sep 2026 – Present

- Build **Spot**, an AI-powered advertising platform, translating customer and operational problems into product requirements, AI-agent workflows, skills, and engineering initiatives across campaign planning, analysis, creative, and ad execution.
- Designed and evaluated AI-agent workflows using **ablation testing, structured evaluations, Langfuse, and PostHog**; consolidated 10 funnel-analysis skills into one workflow, improving evaluation score from **11.19 to 11.81** and reducing the model-performance gap from **3.63 to 0.13**.
- Helped expand Spot from **Meta Ads to Google Ads**, supporting capabilities across **Search, Demand Gen, and Performance Max**, including keyword research, campaign workflows, asset handling, and cross-channel analysis.
- Analyzed customer campaigns across **Godrej, Casantro/Livspace, and NYVO**, identifying funnel, attribution, targeting, and optimization problems and translating findings into product requirements and reusable campaign-intelligence capabilities.

Revspot.ai | Product Management Intern Bengaluru, India | Jun 2026 – Aug 2026

- Identified recurring advertising workflow problems and translated them into **AI skills, product specifications, evaluation frameworks, and reusable workflows**.
- Built and analyzed campaign-intelligence workflows across **lead generation, targeting, creative analysis, funnel performance, and budget tracking**, using real campaign data to inform product decisions.

Education

Vellore Institute of Technology | B.Tech in Computer Science & Engineering (Data Science)
Vellore, India
May 2026 | CGPA: 7.8/10

Skills

- **Product Management:** Product Discovery, PRDs, User Problem Analysis, Feature Prioritization, Product Analytics, Experimentation, Agile/Scrum
- **AI & Agentic Systems:** AI Agents, Agent Evaluation, Prompt Engineering, Skill Design, MCP, Ablation Testing, Langfuse, PostHog
- **Advertising:** Meta Ads, Google Ads, Campaign Planning, Lead Generation, Keyword Research, Funnel Analysis, Creative Analysis
- **Technical:** Python, SQL, PostgreSQL, REST APIs, Git/GitHub, AWS, Streamlit, Power BI

Projects

XAI Governance & Model Risk Management System GitHub

- Built a credit-risk prediction system using **Random Forest, XGBoost, Voting Ensemble, SHAP, and fairness metrics**, achieving **78% accuracy and 0.775 ROC-AUC** on 1,000 samples.
- Applied **SMOTE, feature selection, drift detection, and governance checks**, reducing feature space from **65 to 33 dimensions** and supporting model-risk monitoring.

TrendSage Lite – Global Sentiment & Event Tracker GitHub

- Engineered an NLP pipeline analyzing **60+ headlines across 30+ countries**, automating sentiment and named-entity extraction and reducing manual analyst effort by **85%**.
- Built a **Streamlit dashboard** with multi-filter UX, improving accessibility for non-technical users by **40%**.

Leadership & Achievements

External Management Head | Team Vyadh, Martian Rover Project 2023 – 2025

- Coordinated execution across **5+ engineering domains** and Agile planning for a **30+ member team**; secured **7 sponsorships** generating approximately **Rs. 3.5L** for hardware development.
- **International Rover Challenge 2025:** 13th internationally **International Rover Design Challenge 2025:** Top 5 internationally.
